EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Joseph Sofer on March 29, 2004.

The application has been amended as follows:

Delete claim 18 and replace with following claim:

18. (currently amended) An optical signal transmitter comprising:

[a] a laser module including a laser diode for outputting an optical signal to be transmitted and a cooling/heating element for adjusting the temperature of the laser diode;

a first driving circuit for driving said laser diode;

a second driving circuit for driving said cooling/heating element;

a parameter deviation detector to detect a first control deviation of a parameter responsible for causing variations of optical wavelength output from said laser diode from a predetermined target value;

an optical wavelength deviation detector to detect a second control deviation of optical wavelength output from said laser diode from a predetermined target value; and

a selector connected to said detectors so as to select either of said first and second control deviations[; and] , wherein at least one of said first and second driving circuits is connected between said output of said selector and said laser module, to control said laser module so that said selected control deviation is reduced [a controller connected between the output of said selector and one of said driving circuits to control said laser module so that said selected control deviation is reduced].

The following is an examiner's statement of reasons for allowance:

After reviewing applicant's amendment, arguments and conducting an updated search none of the cited prior arts alone or in combination discloses the claimed laser system with recited limitations of independent claims 17,18,22,25 and 27 having control circuits for controlling the wavelength due external perturbations, where a selector selects the appropriate control signal for adjusting the laser driver thereby the stabilizing the output wavelength.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Armando Rodriguez whose telephone number is 571-272-1952. The examiner can normally be reached on flex / M-F.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Don Wong can be reached on 571-272-1834. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
